MARCIN PAPIEŻ

Frontend Developer

PERSONAL PROFILE

I am a graduate of an IT technical school, I have been interested in creating websites for 2 years. I have already created some websites for companies. I am looking for a job, because I would like to be part of a larger project in which I could develop and show commitment. I consider myself to be an independent person who is fast learner and ready for challenges, because programming is my passion.

TECHNOLOGY STACK

Main: HTML, CSS, JavaScript, React, Redux, Bootstrap
Known: Node.js, MongoDB, Express, PHP, Firebase

CAREER HISTORY

NETWORK FITTER

F.H.U. Intersieć, 06.2019-07.2019

- My duties included installation, repair and maintenance of network installations. Working with clients was a valuable experience for me.

PROJECTS

BARBERSHOT.PL

My first commercial project for the barbershop.

Simple page made in Bootstrap. I used ScrollReveal for the animation.

STOCK CHARTS APP

The application displays the stock chart of the selected company. After logging in, you can subscribe to your favorite chart to see it in the subscribed tab.

Website created with React, Redux, Node.js, MongoDB and Express. I used Bootstrap for the styling.

MEMORY GAME

Classic memory game.

Simple game created with React and Bootstrap.

REGISTRATION APP

The application consists in registering a day in the calendar. Current registration is displayed in the Home tab.

Website also created with React, Redux, Node.js, MongoDB, Express and Bootstrap for the styling.
